

Plant Detectives worksheet

1) Look at the examples of seed packets. What are the differences between modern seed packets and the ones Darwin made by hand?

2) Now design a seed packet for the mystery seed, including some useful instructions for sowing and growing the mystery seed for next year's Plant Detectives. Don't forget to include some of the information you've worked out or researched – like the germination conditions. This sort of information is usually provided on seed packets to help people sow their seeds properly.
